WORK HISTORY

SOFTWARE ENGINEER
01/2018 to 02/2020

C.C. Consulting | Jimbocho, Tokyo

- Implemented API integrations to sync marketing data for our email campaigns.
- Contributed features (business logic and front-end development) for our CRM rebuild in Phalcon.
- Unit, integration, and behavioral testing on Jenkins using Codeception.
- Responsible for deployments/db management on AWS using Linux and Apache.

SOFTWARE ENGINEER
04/2017 to 12/2017

Chromaplex | Portland, OR

- Contract developer for an application that managed participants in pharmaceutical clinical trials.
- Used a reactive framework (Vue.js) to load data from Laravel APIs, for filtering, editing, and submitting client data.
- Developed many features under abbreviated time constraints while learning new development tools.

JUNIOR SOFTWARE ENGINEER
09/2016 to 04/2017

Vacasa | Portland, Oregon

- Developed back end services inside a microservices architecture.
- Implemented a JWT authentication replacement for our auth service in Laravel.
- Created libraries for partner teams utilizing a Semver versioning system.

EDUCATION

Master of Science | Public Policy   *06/2013*

Oregon State University, Corvallis, OR
